

Amendments to the Claims

This listing of the claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

1. (Currently Amended): An LCD panel, comprising:
a main body having a common electrode; and
a sliding adjustment disposed on the main body connected to the common electrode and having a guiding groove and a sliding piece therein, the sliding piece being horizontally shifted in the guiding groove along a path on a surface of the LCD panel to change the common voltage of the common electrode.
2. (Currently Amended): The LCD panel as claimed in claim 1, wherein the main body has a ground terminal, and the sliding adjustment is electrically disposed between the common electrode and the ground ~~point~~ terminal.
3. (Original): The LCD panel as claimed in claim 1, wherein the main body has a plurality of pixels connected to the common electrode.
4. (Original): The LCD panel as claimed in claim 3, wherein each of the pixels has a compensation capacitor connected to the common electrode.
5. (Original): The LCD panel as claimed in claim 1, wherein the sliding adjustment is a sliding variable resistor.
6. (Currently Amended): The LCD panel as claimed in claim 5, wherein the sliding variable resistor changes ~~the~~ a resistance between the common electrode and ~~the~~ a ground terminal.
7. (Currently Amended): An LCD panel, comprising:

a main body; and

a sliding adjustment disposed on the main body and having a guiding groove and a sliding piece therein, the sliding piece being horizontally shifted in the guiding groove along a path on a surface of the LCD panel to change a resistance acting on the main body.

8. (New): An LCD panel, comprising:

a main body; and

at least two sliding adjustments disposed on the main body and each having a guiding groove and a sliding piece therein, each of the sliding pieces being horizontally shifted in the corresponding guiding groove along a path on a surface of the LCD panel to change a respective resistance acting on the main body.
